

JONES & VINING

Founded in 1930, Jones & Vining, Incorporated has evolved from a major American manufacturer of lasts to a leading manufacturer and distributor of shoe components, throughout the world. More than 75 years ago there were 40 last manufacturers. Today, Jones & Vining is the only remaining American manufacturer of lasts. "JV", as we are known, is considered one of the most successful developers and suppliers of lasts and footwear components worldwide.

Known for technical innovation and revolutionary design, JV promises to listen carefully to our customers' needs and respond with custom-designed solutions to exceed your expectations. Jones & Vining is a true global pioneer, providing quality, innovation, and customer service that respects the traditions and cultures of countries and their citizens throughout the world. For more information or to speak with a JV customer representative, call 508 894-0018.

CUSHIONING FOAMS

PRECISION • QUALITY • INNOVATION

STEP INTO THE FUTURE

JV

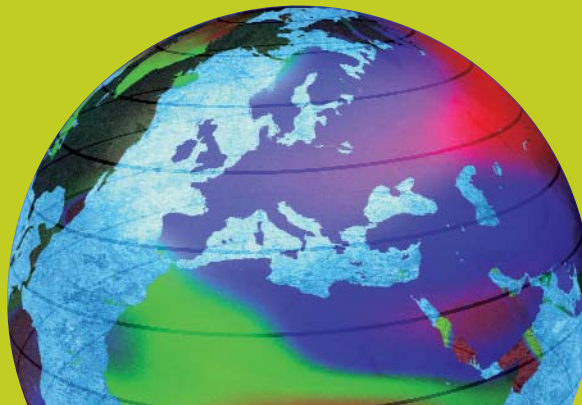

INNOVATIVE DESIGN

Jones & Vining, a leading supplier of superior footwear components worldwide, including cushioning foam materials, is known for technical expertise, innovative design, and quality construction. In response to increased consumer demand for greater comfort in footwear, JV partnered with a leading Asian manufacturer, in 1991 to provide quality branded “open cell” Polyurethane cushioning foams that provide ultra comfort and resiliency within a foot-friendly environment. In addition to our established success in molding poured PU for outsoles, JV now offers molded PU insoles, prepared in single or multi-densities and/or in combination with elastomeric and stabilizing TPU components. JV enjoys customer loyalty from leading international and domestic brands because we guarantee consistent quality, comfort, and fit.

JV OFFERS

Our family of Poliyou® cushioning foams blend comfort with a system that promotes a healthy foot environment. Cost-effective cushioning benefits are available in die-cut or as a single foam molded insole. "Multi-Density" insoles are prepared by combining any of our foams, or by attaching any of our foams as a top layer to an EVA or poured PU base. To elevate the look as well as the overall feel of these performance cushioning foam materials, unique bottom pads and top cover materials provide an added benefit and visual effect.

CUSHIONING FOAMS

- Poliyou®, the “original” open cell PU foam is breathable, wicks moisture, fights odor with “natural” active carbon, and fights bacteria with Aegis® Anti-Microbials.
- Hydro-Poliyou® (Poliyou® derivative) has maximum “moisture wicking” capabilities.
- Poli-Fresh® (Poliyou® derivative) is available in a range of colors, with printing capabilities.
- Poli-Cork™ (Poliyou® derivative) with the addition of natural “cork” is available.
- Politec® provides “shock absorption” to relieve stress on bones and joints.
- Jumpec® is a lightweight, breathable, open cell PU foam that delivers the “ahhh” factor.
- Imprint™ “slow-recovery” foam conforms to the shape of the foot when worn.
- Springtec™ provides “energy return” to reduce muscle fatigue.

BENEFITS

- “Natural” active carbon and “Aegis®” anti-microbials fight odor and resist fungus and bacteria.
- Poliyou® is made of 70% recycled material.
- Complimentary Poliyou® hangtags are available.
- Poliyou® is washable.
