

JONES & VINING

Founded in 1930, Jones & Vining, Incorporated has evolved from a major American manufacturer of lasts to a leading manufacturer and distributor of shoe components throughout the world. More than 75 years ago there were 40 last manufacturers. Today, Jones & Vining is the only remaining American manufacturer of lasts. "JV", as we are known, is considered one of the most successful developers and suppliers of lasts and footwear components worldwide.

Known for technical innovation and revolutionary design, JV promises to listen carefully to our customers' needs and respond with custom-designed solutions to exceed your expectations. Jones & Vining is a true global pioneer, providing quality, innovation, and customer service that respects the traditions and cultures of countries and their citizens throughout the world. For more information or to speak with a JV customer representative, call 508 894-0018.

LASTS

PRECISION • QUALITY • INNOVATION

STEP INTO THE FUTURE

INNOVATIVE DESIGN

Jones & Vining, a pioneer in the manufacture of lasts, is known for technical expertise, innovative design, and quality construction. Jones & Vining revolutionized the footwear industry in 1984 with the creation of the Compu-Last® system. Considered the industry standard, JV Compu-Last® is an integrated computer-controlled system for precisely grading and producing lasts, worldwide. The only last producer in America, JV continues factory expansion in Asia to serve a rapidly growing international market. JV enjoys customer loyalty from leading international and domestic brands because we guarantee consistent quality and fit.

JV OFFERS

Lasts are the single most important scientific element in shoemaking. The expert manufacture of lasts is the foundation for a well proportioned, comfortable, responsive, and fashionable shoe. Handcrafted first in wood by JV's highly skilled last technicians, the last is transformed to plastic for ease and fast reproduction.

Last models can be made domestically, with data transfer of specifications sent to our Compu-Last® equipped factories. Our JV last factories can partner with our Asian Compu-Last® equipped firms in Thailand or China for quick and easy data transfer for guaranteed precision and accuracy.

LASTS

- Plastic lasts for most shoe constructions
- Plastic smart lasts for use in injection-molded footwear for higher use tolerances
- Plastic lasts for vulcanized construction, using a Polypropylene plastic to withstand high temperature settings (up to 155 degrees C) that leading athletic brands praise for overall quality and consistency

BENEFITS

- The Compu-Last® system can interface with CAD (computer aided design) systems for the development of patterns, materials, and styles.
- With more than 75 years of experience and historical data, JV offers customers comprehensive knowledge of lasts to create future and retro-inspired last design.
- Our knowledgeable Asian-based western-style model maker oversees production of perfect fitting lasts that conform to U.S. standards.
- We focus on standardized accuracy, high quality, and customer service.
